

MPS Seminar Series
-Fall Semester 2018-
Mondays at 4:10 p.m.
(cookies and coffee at 4:00 p.m.)
Location: 1200 MPS Auditorium

Date	Speaker	Title
9/17/18	<p style="text-align: center;">Jian Xu Chinese Academy of Sciences</p>	Screening and Engineering Industrial Oleaginous Microalgae via Ramanome Technology Platform
9/24/18	<p style="text-align: center;">Prof Jennifer Ogilvie University of Michigan</p>	Multidimensional Spectroscopic Studies of Purple Bacterial Photosynthesis.
10/8/18	<p style="text-align: center;">Prof Xiao-Ning Zhang St. Bonaventure Univeristy</p>	How do plants cope with perturbation of pre-mRNA splicing?
10/15/18	<p style="text-align: center;">Sharon Kessler Purdue University</p>	Female Control of Reproductive Success in <i>Arabidopsis thaliana</i>
10/22/18	<p style="text-align: center;">Tyler Ford Addgene</p>	Science Writing and Communication
10/29/18	<p style="text-align: center;">Prof Sally Assmann Pennsylvania State University</p>	Abiotic Stress and Signalling, esp Drought
11/5/18	<p style="text-align: center;">Prof. Hans-Henning Kunz Washington State University</p>	Chloroplasts Ion Transport Mechanisms and Their Role in Photosynthesis and Organellar Function
11/12/18	<p style="text-align: center;">Prof Erin Tripp University of Colorado-Boulder</p>	Lichens and Molecular Genetics of Obligate Mutualisms
11/19/18	<p style="text-align: center;">Prof Zhongchi Liu University of Maryland</p>	Genomic and genetic analyses linking genes and gene networks to reproductive development in the wild strawberry.
11/26/18	<p style="text-align: center;">Prof Carsten Kulheim Michigan Technological University</p>	Genes to Ecosystems: The Problem of Complex Traits.
12/3/18	<p style="text-align: center;">Prof. Hui-Ling (Sunny) Liao University of Florida</p>	Functional Diversity of Forest Microbiomes and Their Consequences.

MPS Seminar Series
-Spring Semester 2019-
Mondays at 4:10 p.m.
(cookies and coffee at 4:00 p.m.)
Location: BCH 101

Date	Speaker	Tentative Title
1/14/19	Kenny (Kun) Wang	Kende award winner
1/28/19	Hong Qiao-Univ of Texas-Austin Host: Jianping Hu	Chromatin & transcription regulation in ethylene response
2/4/19	Elizabeth Sattely—Stanford Host: Rob Last	
2/11/19	Aman Husbands-Ohio State Univ. Host: Beronda Montgomery	Do ligand-binding transcription factors drive morphological complexity?
2/18/19	Michael Phillips-Univ of Toronto Host: Bjoern Hamberger	Isotopic labeling studies in plant terpenoid metabolism
2/25/19	Jose' Pruneda-Paz-Univ of California-Davis Host: Eva Farre'	
3/11/19	Olga Zobotina-Iowa State Univ Host: Federica Brandizzi	Elucidation of the xyloglycan-synthesizing multiprotein complexes in Golgi and how they can determine the polysaccharide native patterns.
3/18/19	Luis Herrera-Estrella Host: Sheng Yang He	
3/25/19	Christine Queitsch-Univ of Washington Host: Erich Grotewold	
4/1/19	Joyce Van Eck—Boyce Thompson Institute Host: Rebecca Grumet	Application of Gene Editing to Accelerate Improvement of Underutilized Crops
4/8/19	Christian Hardtke-Univ of Lausanne, Switzerland Host: Brad Day	The phloem nexus of the plexus
4/15/19	Ilka Axmann - Univ of Dusseldorf Host: Susanne Hoffmann-Benning	What time is it? How cyanobacteria prepare for day and night with a biochemical clock
4/22/19		Anton Lang Award
